The election, if it is made, must be for a minimum of 10%, or a multiple thereof, of such compensation in DSUs. DSUs awarded under the DSU Plan in lieu of annual or bonus compensation will vest immediately.

In addition, the Board of Directors has the authority to make discretionary awards of DSU’s to Participants under the DSU Plan. DSUs granted pursuant to discretionary awards will vest in accordance with the vesting schedule determined by the Board of Directors. Generally, DSUs will vest equally over three years, with one-third of the awarded DSUs vesting on each of the first, second and third anniversaries of the date of the award.

All unvested DSUs will vest immediately in the case of a change of control of the Company. Each vested DSU held by a Participant who ceases to be an eligible employee, director or officer shall be redeemed by the Company effective as at the separation date for DSU Plan shares issued from treasury.

Credit risk

The Company manages credit risk by holding its cash and cash equivalents with high quality financial institutions in Canada, where management believes the risk of loss to be low. The Company also has approximately \$3.7 million of Mexican VAT receivable as at December 31, 2025 (March 31, 2025 - \$3.0 million). While the Company is still pursuing collection, with the delay in processing and collection, management determined that it was appropriate to continue to recognize the VAT receivable, other than known collections, to resource properties as a cost of exploration. The timing and amount of the VAT ultimately collectible could be materially different from the amount recorded in the interim unaudited condensed consolidated financial statements.

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions.
