Deferred share units

The Company has a deferred share unit plan (the "DSU Plan") whereby Participants may elect to receive all or a portion of their annual compensation or bonus compensation, if any, in deferred share units ("DSUs"). The election, if it is made, must be for a minimum of 10%, or a multiple thereof, of such compensation in DSUs. The number of DSUs received is equal to the amount of compensation elected to be received in DSUs, divided by the volume-weighted average trading price of the common shares on the TSX for the 5 trading days immediately prior to the payment date. DSUs awarded under the DSU Plan in lieu of annual or bonus compensation will vest immediately.

In addition, the Board of Directors has the authority to make discretionary awards of DSU's to Participants under the DSU Plan. DSUs granted pursuant to discretionary awards will vest in accordance with the vesting schedule determined by the Board of Directors. Generally, DSUs will vest equally over three years, with one-third of the awarded DSUs vesting on each of the first, second and third anniversaries of the date of the award.

All unvested DSUs will vest immediately in the case of a change of control of the Company. In addition, in the event of the death or termination without cause of a Participant that received DSUs, the Participant's DSUs will vest immediately. The Board of Directors may at any time shorten the vesting period of any or all DSUs.

The maximum number of common shares issuable under the DSU Plan is 10,000,000. Each DSU held by a Participant must be redeemed by the Company within 10 years of the grant for DSU Plan shares issued from treasury. Each vested DSU held by a Participant who ceases to be an eligible employee, director or officer shall be redeemed by the Company effective as at the separation date for DSU Plan shares issued from treasury.

11 Financial instruments and other

Credit risk

The Company manages credit risk by holding its cash and cash equivalents with high quality financial institutions in Canada, where management believes the risk of loss to be low. The Company also has approximately $6.8 million of Mexican VAT receivable as at June 30, 2023. The Company has recorded the VAT to resource properties. While the Company is still pursuing collection, with the delay in processing and collection, management determined that it was appropriate to reclassify this amount to the resource property to which the VAT paid is related. The timing and amount of the VAT ultimately collectible could be materially different from the amount recorded in the consolidated financial statements.

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions.

Management concluded that the Company has sufficient cash on hand to meet its obligations as they become due for the next twelve months, considering the Company's planned exploration and development activities on its resource properties. The Company has the ability to scale its exploration and development activities, and will do so as necessary, based on cash availability. The Company will need to raise further financing to fund future additional exploration and development activities.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates and commodity and equity prices.

a) Interest rate risk

The Company has no interest-bearing debt and aside from the interest earned on its cash balances is not exposed to any significant interest rate risk.

b) Foreign currency risk

The Company operates in Mexico, giving rise to foreign currency risk. To limit the Company's exposure to this risk, cash is primarily held with high quality financial institutions in Canada.

As at June 30, 2023, the Company held the following financial instruments in foreign currencies:

	US$	Pesos
Cash	233,587	63,240
Accounts payable and accrued liabilities	1,049,280	11,976,403

11. Financial instruments and other (continued)

c) Price risk

The Company is not exposed to any direct price risk other than that associated with commodities and how fluctuations impact companies in the mineral exploration and mining industries as the Company has no significant revenues.

12 Commitments

The minimum remaining payments in relation to the Company's El Tigre Agreement (note 6) are as follows:
