

## NEWS RELEASE

### **Silver Tiger Metals Inc. has Commenced Trading in the US on the OTCQB With Trading Symbol “SLVTF”**

**HALIFAX, NOVA SCOTIA – May 26, 2020** – Silver Tiger Metals Inc. (TSXV:SLVR and OTCQB:SLVTF) (“Silver Tiger” or the “Company”) is pleased to announce that its common shares are trading on the OTCQB, a US interdealer quotation system, under the symbol SLVTF. Real-Time Quote Display Service for SLVTF is available at: <http://www.otcmarkets.com/stock/SLVTF/quote>. Silver Tiger’s common shares also trade on the TSX Venture Exchange under its trading symbol SLVR.

OTC Markets Group Inc., located in New York, N.Y., operates the world’s largest electronic inter-dealer quotation system. It offers transparent trading to development stage companies that have met a minimum bid price test, are current in their financial reporting and have undergone an annual verification and management certification process.

In connection with the OTCQB listing, Silver Tiger has DTC eligibility with the Depository Trust Company for its shares on the OTCQB. The Depository Trust Company (DTC) is a subsidiary of the Depository Trust & Clearing Corp. and manages the electronic clearing and settlement of publicly traded companies. Securities that are eligible to be electronically cleared and settled through the DTC are considered DTC eligible. This electronic method of clearing securities speeds up the receipt of stock and cash, and thus generally accelerates the settlement process for investors.

#### **VRIFY Slide Deck and 3D Presentation**

VRIFY is a platform being used by companies to communicate with investors using 360° virtual tours of remote mining assets, 3D models and interactive presentations. VRIFY can be accessed by website and with the VRIFY iOS and Android apps.

#### **About Silver Tiger**

Following the completion of the maiden El Tigre resource estimation (the full NI 43-101 technical report is posted to the Company’s website at [www.silvertigermetals.com](http://www.silvertigermetals.com) and can also be accessed on SEDAR at [www.sedar.com](http://www.sedar.com)) the Company directed its exploration efforts at identifying other areas of silver-gold mineralization across the expansive property holdings (28,414 hectares). The Company’s prospecting and mapping program identified in excess of 10 kilometers of favorable host stratigraphy (i.e. the El Tigre formation) with several areas of mineralization identified to the south, east and north-east of the old El Tigre Mine. The El Tigre formation is the rock package that hosts the historic El Tigre Mine, which operated from 1903 to 1938, and was reported to have produced a total of 353,000 ounces of gold and 67.4 million ounces of silver from 1.87 million tonnes averaging 7.54 g/t gold and 1,308 g/t silver (Steven D. Craig, B.A., M.Sc., P. Geo. 2012).

The Company's drilling completed after filing its' 43-101 compliant resource estimate intersected similar-style silver-gold mineralization in the El Tigre formation at the Protectora, Caleigh and Fundadora areas to the north of the old mine, as well as to the south, past Gold Hill. Drilling to the north of the old mine by the Company returned the following impressive silver-gold intercepts:

Hole ID	Comment	From (meters)	To (meters)	Length <sup>(1)</sup> (meters)	Au (g/t)	Ag (g/t)	AgEq <sup>(2)</sup> (g/t)
ET-17-144		88.25	91.40	3.15	10.1	1,990.9	2,748.4
	<i>including</i>	88.25	89.10	0.85	37.2	7,338.9	10,128.9
	<i>and</i>	188.65	190.15	1.50	0.024	1,107.3	1,109.1
ET-17-145		28.50	29.25	0.75	10.9	2,830.4	3,647.9
ET-17-148		90.10	90.60	0.50	9.83	2,247.1	2,984.35

Notes to Table:

- (1) True width has not been calculated for each individual intercept, but true width is generally estimated at 75-90% of drilled width. Metallurgical recoveries and net smelter returns are assumed to be 100%.
- (2) Silver Equivalent ("AgEq75") ratio based on silver to gold price ratio of 75:1 Ag:Au.

These diamond drill holes were some of the last holes drilled by the Company with no follow up drilling in this area having been undertaken. The Company intends to recommence drilling these unmined Northern high-grade vein extensions.

**CAUTIONARY STATEMENT:**

*Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.*

*This News Release includes certain "forward-looking statements". All statements other than statements of historical fact included in this release, including, without limitation, statements regarding potential mineralization, resources and reserves, the ability to convert inferred resources to indicated resources, the ability to complete future drilling programs and infill sampling, the ability to extend resource blocks, the similarity of mineralization at El Tigre to the other mines in Mexico, exploration results, and future plans and objectives of Silver Tiger, are forward-looking statements that involve various risks and uncertainties. Forward-looking statements are frequently characterized by words such as "may", "is expected to", "anticipates", "estimates", "intends", "plans", "projection", "could", "vision", "goals", "objective" and "outlook" and other similar words. Although Silver Tiger believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, there can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from Silver Tiger's expectations include risks and uncertainties related to exploration, development, operations, commodity prices and global financial volatility, risk and uncertainties of operating in a foreign jurisdiction as well as additional risks described from time to time in the filings made by Silver Tiger with securities regulators.*
